BYD Blade Battery is currently the best example of a good module-less and cobalt-free battery for electric vehicles. When it was launched, the energy density was at 140 Wh/kg, then slowly increased to 150 Wh/kg. Recently, BYD Chairman Wang Chuanfu revealed for the first time at a financial report communication meeting that BYD is currently developing a ...

The Blade Battery passed the nail penetration test, without emitting smoke or fire. The surface temperature only reached 30 to 60°C. Optimised strength. Arranged in an array in one pack, each cell serves as a structural beam to help withstand the force. The aluminum honeycomb-like structure, with high-strength panels on upper and lower ...
