There's plenty of great info out on the internet about how to build battery packs and you need to do a lot more research. For example, 48 cells in series would be a 172v battery. Another example, if you were building 16 cell parallel groups and only have 64 cells total, you could only make (64/16) 4 groups, wire those in series for a 4s16p pack at 14.4v nominal.
