

What is a safety certified capacitor?

Safety certified capacitors for interference suppression in AC line filtering applications KEMET ceramic surface mount (SMD) safety certified capacitors are specifically designed for interference-suppression AC line filtering applications.

What is a Kemet ceramic surface mount capacitor?

KEMET ceramic surface mount (SMD) safety certified capacitors are specifically designed for interference-suppression AC line filtering applications. When comparing to radial leaded disc capacitors, the CAS surface mount form factor provides engineers the ability to miniaturize their designs with a higher density solution.

What is x/y safety rated capacitor?

Loading your content... X/Y capacitors are used in mains-connected applications to minimize the amount of conducted EMI common in many electrical devices. Surface mount X/Y safety-rated capacitors allow for the miniaturization of devices without compromising performance.

Why do you need a capacitor?

Having internationally recognized safety certifications, these capacitors are well-suited for applications that require keeping potentially disruptive or damaging line transients and EMI out of susceptible equipment. They are also an ideal solution when needing to suppress line disturbances at the source. Loading your content...

Class X1/Y2 safety capacitor offered by Vishay (PDF). Safety Approval Logo Markings. All safety-certified capacitors should have the proper logo markings/symbols on ...

How safety capacitors work. Safety capacitors refer to safety capacitors that do not cause electric shock after the capacitor fails, and do not endanger personal safety. Safety capacitors are typically only used for filtering in anti-jamming circuits. They are used in the power supply filter to filter the power supply and filter the common mode and differential mode ...

A sales guarantee is a promise that you make to your prospects or customers about the quality, performance, or satisfaction of your product or service. It is a way of showing that you stand behind your offer and that you are confident that it will meet or exceed their expectations. A sales guarantee can also help you overcome objections, reduce ...

Ultimately, exception guarantees are about ensuring objects are in a consistent state so the object can be safely destroyed (the basic guarantee) or that all operations on an object are undone so the object reverts to its

previous state when an ...

"Across-the-line" capacitors should be replaced with type X2, X1/Y2 or Y2 safety capacitors.
o"Line-to-ground" line filter capacitors should be replaced with Y2 or X1/Y2 safety capacitors. (do not use X2 type). A Y2 capacitor can safely be used in place of an X2 capacitor, but an X2 capacitor should not be used in place of a Y2 capacitor.
