

The utility model relates to the technical field of electrical equipment, in particular to an intelligent combined anti-harmonic low-voltage power capacitance compensation device, which comprises a case, a front panel, a wiring board and a base; the front panel is arranged at the front part of the case, and a display module is embedded in the front panel; a top plate is arranged at the top of ...

HKKIC6 Series Anti-harmonic Smart Capacitors. Product Category: Capacitor Product introduction: HKKIC6 series resistance harmonic type intelligent capacitor is a (O type) or (Y) pressure power capacitor as the main body, the software and hardware technology, the micro sensor technology, microelectronics miniature network technology and electrical appliance ...

Get the app Become a supplier 100 kvar anti-harmonic intelligent capacitor bank price of non-linear electrical equipment

The anti-harmonic intelligent capacitor is high-precision and high-efficiency capacitor equipment, and can automatically adjust capacitance and response speed by detecting...

This utility model provides anti-harmonic wave intelligent capacitor mechanism, it includes capacitor, reactor, base, wherein, base is rectangle, its end, two ends is provided with stair-stepping installing plate, plate dress plate is provided with upper and lower through mounting groove, base top one end is provided with cradle, electric-controlled plate it is provided with ...

HY series intelligent combined anti-harmonic low voltage power capacitor is a new integrated module for reactive power compensation. which is applied in 0.4kV low voltage distribution network to save energy, harmonic mitigation ...

Product Description Overview HY series intelligent combined anti-harmonic low voltage power capacitor is a new integrated module for reactive power compensation. which is applied in 0.4kV low voltage distribution network to save energy, harmonic mitigation and ...

A technology of intelligent capacitance and harmonics, applied in the field of capacitors, can solve problems such as capacitor damage and inability to perform reactive power compensation, and achieve the effects of prolonging service life, improving maintenance, and reducing the ...

General device designed for 0.4kV power grids. It consists of measurement and control module, capacitor switch-ing and composite switch, capacitor protection module, and two (type) or one ...

Anti-harmonic intelligent capacitor OVE800R. Intelligent capacitor R type is based on type or Y type

low-voltage power capacitor as the main body, using microelectronics. hardware and software technology, micro sensor technology, micro network technology and electrical manufacturing .

The integrated anti-harmonic intelligent power capacitor comprises a measurement and control component, a compound switch, a protection component and an execution ...

Example 2: YDXF7-30, which means the common type of compensation compensation Kang harmonic intelligent power capacitor, the capacity is 30kvar, YDXF14-30-XX, which means the special phase-separated anti-harmonic smart capacitor, the capacity is 30kvar, the rated voltage is 300V, Internal string 14% reactor. Product working principle

The utility model discloses a compensate anti-harmonic intelligent capacitor, the on-line screen storage device comprises a base, the up end of base can be dismantled and be connected with the shell, the inside of shell is provided with the shock attenuation post, shock attenuation post fixed connection is at the up end of base, the up end fixedly connected with ...

Product Description Overview HY series intelligent combined anti-harmonic low voltage power capacitor is a new integrated module for reactive power compensation. which is applied in 0.4kV low voltage distribution network to save energy, harmonic mitigation and improve power factor, instead of the ...

The integrated anti-harmonic intelligent power capacitor comprises a measurement and control component, a compound switch, a protection component and an execution component which are arranged in a matched manner; the measurement and control assembly is used for carrying out integrated control and setting related operation parameters and comprises a controller and a ...

We're professional anti-harmonic intelligent power capacitor manufacturers and suppliers in China. We warmly welcome you to wholesale high quality products made in China here from our factory. For customized service, contact us now. Nianhua.zheng@chnjn +86-712-2612818. Home; About Us. Our Service;
