

Where can I find a test summary report for a lithium battery?

The UN38.3 Test Summary Report is NOT part of the documentation required to transport lithium batteries. Sometimes the UN38.3 Test Summary Report can be found online using an internet search. If the manufacturer of the battery is known, individuals can attempt to obtain the report from the manufacturer.

What is a test summary report?

The UN38.3 Test Summary Report is a condensed version of the full UN38.3 Test Report. The UN38.3 Summary Report is a document that is completed by battery manufacturers that certifies their battery is safe for transport.

What are the new battery report criteria?

The new report criteria include all of the essential elements that an agency would need to ensure that batteries themselves are in compliance with the regulations. There is no specific format mandated, but the elements of information must be present and must be presented to the authorities in a timely manner when requested.

What is the lithium battery compliance report format?

This report format is intended for enforcement agencies who need to access a standard set of information and data when reviewing compliance for lithium batteries and the UN manual of tests and criteria.

What are the UN tests for batteries?

Just as a reminder, for those of you who might not be familiar with the UN tests for batteries or cells, they replicate conditions in transport, and include tests like an impact test, pressure test, overcharge test, etc. Those tests can be found here.

What is the form and format for a lithium battery TS?
