

What causes a battery to stop charging?

Here are a few potential causes: **Charging Port Issues** The charging port itself may be faulty or loose, leading to intermittent charging. A faulty port may cause the charger to be recognized but fail to supply consistent power to the battery. **Power Circuit or Charging IC** The internal circuitry that controls charging may be malfunctioning.

Why is my laptop battery not charging?

If your battery isn't fully charging, the first thing you can try is the Battery troubleshooter in Windows 10. Complete the wizard then restart your device to see if the problem is resolved. Most laptop computers include their own factory diagnostics utilities, too. It is recommended you also use those to test your battery.
