

Why does the battery light not turn on if plugged in?

Therefore,even if an AC adapter is connected to the notebook,the battery does not charge if its charge level is at 95% or greater. If the AC adapter is plugged into the notebook and the battery charge level is 95% or greater,the battery light does not turn on until the battery charge level is 94% or less and the battery begins to charge.

When does the battery light turn on?

The battery light turns on only if the battery charge is between 0 and 94%when power is connected. To reduce the number of short-charge cycles and extend the service life of the battery,the notebook is designed to start charging only when the battery capacity is below 95%.

Why is my HP laptop battery not charging?

HP Notebook PCs use lithium ion (Li-ion) batteries, which are charged using a fast charge/slow charge cycle. The battery is continuously infused with full power (fast charge), and then alternates with much less power (slow charge). During the slow charge stage of the cycle, the battery light might turn off and appear as though it is not charging.

Does my laptop turn on if it's fully charged?

No it does not. Will not turn on no matter what,but is indicating that it is fully charged. Just to verify. You only have the charged light on when you start the laptop,or does the power light come on as well? Have you tried holding the power on button for at least 10 seconds to see if it starts?

How do I know if my laptop battery is slow charging?

The battery is continuously infused with full power (fast charge),and then alternates with much less power (slow charge). During the slow charge stage of the cycle,the battery light might turn off and appear as though it is not charging. You can confirm that the battery is slow charging by checking the battery status in the taskbar.

Why does the battery light blink red if there is no battery?

This might take several days because there is no drain on the battery while the notebook is running on AC power. The user guide might state that the battery light blinks red if there is no battery in the notebook. This is incorrect. The battery light is off if there is no battery in the notebook. What can we help you with?
