

What is a battery pack & shape designer?

Our Battery Pack and Shape Designer is a powerful tool designed for DIY enthusiasts and professionals who want to create custom battery packs. Whether you're working on electric vehicles (EVs), drones, or portable devices, our tool allows you to configure, simulate, and visualize battery setups to meet your specific needs.

How to design a battery pack?

To design a battery pack, you first need to finalize the nominal voltage and capacity of the pack, either in terms of Volt, mAh/Ah, or Wh (in this case, 18000 Wh). The individual cell: ANR26650M1-B has a nominal voltage of 3.3 V and current capacity. The process continues with selecting the battery management system, designing the enclosure, and assembling the cells.

How to model battery pack?

AIM: Modelling of Battery Pack. a. Configure the batteries as per a Lithium-ion battery datasheet. b. Explain your parameters. c. Simulate the model and comment on the results for SOC, voltage, current in detail. d. Change the configuration to 4S3P and simulate the model. e. Compare the results for both models and give your explanation for the results.

What are the key functions and capabilities of the battery pack designer?

Here are some of the key functions and capabilities of our battery pack designer: Configuration Options: Users can specify the desired configuration of battery cells, including series and parallel connections, to achieve the desired voltage, battery capacity, and current handling capabilities for their applications.

What is a battery pack designer tool?

Our battery pack designer tool is a web-based application that helps engineers and DIYers build custom DIY battery packs for various electronic devices or applications. This tool streamlines the battery pack design process by providing a range of features and functionalities to assist in the design and optimization of battery packs.

Why do you need a battery pack design tool?

The rising demand for DIY battery packs, replacement battery packs, and lithium-ion battery solutions has made it essential to have a tool that simplifies the design process. With our intuitive tool, you can create a battery pack tailored to your project's performance requirements.
