

What does a coloured battery indicator on Windows 11 mean?

Windows 11 coloured battery indicator. (Image credit: Microsoft) The updated icons use black, yellow, green, and red colours to depict different battery conditions. Black indicates the battery is in normal mode, green shows that it is charging, yellow signals that the laptop is in power saver mode, and red stands for critically low battery.

Where are the colored battery icons on Windows 10?

Microsoft says the new colored battery icons will be visible on the taskbar in the system tray, in the Quick Settings flyout, and in Settings. It also plans to show them on the lock screen, but in a future build. In addition to colored battery icons, the build also brings support for battery percentage which will be visible on the taskbar.

What colour is a battery & how do I know if it's dead?

These four colours will be: black for normal status, green for charging, yellow for low battery alert, and red for the battery being severely low. "This welcome enhancement is all about clarity, practicality, and keeping you off the dreaded 'Oh no, my battery's dead!' cliff," Microsoft blog post mentioned.

What does a green battery icon mean on Windows 10?

With the new build, the battery icon will now display black, yellow, or green depending on the state. When the icon is green, Microsoft says it indicates that the PC is charging and is in a good state, while a yellow icon shows the battery is in energy saving mode.

Does Windows 11 have colored battery icons?

Windows 11's colored battery icons are a welcome feature. (Image source: Microsoft) Microsoft has released a new Windows 11 Insider Build that brings small but significant changes to how battery information is displayed on PCs. These changes include colored battery icons that make it easier to know what is going on with a PC's battery.

What's new in a battery indicator?

Increased Indicator: Offers more pixels for a more accurate display of the battery charge level. Charging State: When plugged in, the indicator turns green and includes a lightning bolt icon. Power Saving Mode: The indicator turns yellow when energy saver is enabled. Here's how to enable the new design.
