

What welding equipment repair services are available at BWS?

Welding equipment repair services and calibration available here at BWS. Qualified technicians in MIG repairs, TIG repairs, compressor repairs, infra red repairs, battery charger repairs, spot welder repairs. Onsite or at our workshops.

How often should a battery be plugged into a welder?

Do at least 4 or 5 cycles and then test the battery with a load tester. I have a DC arch welder that can crank out 160 amps if needed. It will run on 110v or 220v but I'm using it on 110v. So far I've tried 2 different batteries and so far 2 failures.

Why do you need a welding repair service?

Serving both collision repair shops and industrial engineering applications. We understand that reliable welding equipment is crucial for your business operations, which is why we offer professional diagnostics, repairs, and preventive maintenance to minimize downtime and extend the life of your equipment.

How do you charge a DC arch welder?

There are different opinions on the "best way"; do so this but most are cycle the charge/rest time in 5 min charge and 10 minutes rest. Do at least 4 or 5 cycles and then test the battery with a load tester. I have a DC arch welder that can crank out 160 amps if needed. It will run on 110v or 220v but I'm using it on 110v.
