

What is battery swapping based on battery rental?

Battery swapping based on battery rental presents an emerging service rendering phenomenon involving logistics operations in terms of asset transfers. Accordingly, swapping service providers typically choose between two pricing strategies: pay-per-swap and subscription (Omkar, Pranav, & Sonia, 2021).

Is battery rental a viable business model for EV swapping stations?

Battery rental greatly enhances the attractiveness of battery-separable EVs to consumers, making it a preferred business model for swapping stations. A swapping service provider may acquire batteries for its customers to rent, but a dedicated renter is in a better position to bear the front-end investment on battery reserve (Noel & Sovacool, 2016).

How do EV swapping service providers pricing based on battery rental?

A swapping service provider may choose between two pricing strategies based on battery rental: pay-per-swap and subscription. This study establishes a game-theoretical model to portray a simplified EV replenishment market including one charging station, one swapping station, and one battery renter, and explores the optimal pricing strategy.

What happens when a swapping station partners with a battery renter?

When a swapping station partners with a battery renter, the former collects the rental charge on behalf of the latter (Liang et al., 2021). Depending on their travel needs, consumers may choose batteries of different capacities (Shi & Hu, 2022).

What is the profit function of a battery swapping station?

On behalf of the battery renter, the swapping station provides $1 + \theta D_B$ rentals to consumers at rate KC , leading to the total rental expense $K C (1 + \theta D_B)$. Incorporating fixed operating cost FO_S , the profit function of swapping station is: $\pi_S = \theta D_B - V O_S D_B q - K C (1 + \theta D_B) - FO_S$.

What does a battery renter do?

The battery renter serves the swapping station and consumers with θD_S and $D_S + D_C$ rentals, respectively, at the same rate KC . There is a battery depreciation cost c associated with each rental service.
