

What is a solar label?

Labels are printed on self adhesive vinyl and are designed to remain legible and in place throughout the design life of the system. Labels are available individually or in quantity on sheets of one type. Used in systems incorporating energy storage systems (including batteries and inverter/chargers) with grid connected solar photovoltaic systems.

What do you use a warning label on a generator?

Used in systems with inverters and diesel generators to warn about the possibility that the generator can start automatically without warning. Small label (100 W x 35 H mm) for use on control panels. Large version (210 W x 65 H mm) for use as a sign on walls/doors etc.

What is a small label used for?

Small label (100 W x 35 H mm) for use on control panels. Large version (210 W x 65 H mm) for use as a sign on walls/doors etc. Used in systems with multiple power supplies such as diesel generators, battery/inverter systems and wind or PV systems. To be posted at all points of isolation. *see manufacturer's documentation for further information

Who are Hally labels?

We would be pleased to meet with you to discuss your labelling requirements, share our knowledge and develop a solution specifically for you.. Hally Labels are experts in the manufacture of excellent quality, customised battery labels and have expertise across a wide variety of applications and requirements.

What options do you have for label production?

We have flexible options for the production of your labels, from high quality short runs through to efficient long runs. Our label experts can design a custom solution, selecting the right material and adhesive to meet both your branding and operational needs.
