

Capacitor Fixture for Air Conditioner Download PDF Info ... Application number KR2019970031376U Other languages ... 1997-11-07 Priority to KR2019970031376U priority Critical patent/KR19990018158U/en 1999-06-05 Publication of KR19990018158U publication Critical patent/KR19990018158U/en

The invention discloses a kind of capacitor case encapsulation fixtures, including operating rack, it operates rack and is equipped with displacement adjusting cylinder, displacement adjusts cylinder and is connected with inner walls clamping device, lift adjustment linear motor is additionally provided in operation rack, lift adjustment linear motor is also connected with the outer clipping ...

The present invention relates to a fixing device for a capacitor, the base 10, the air cylinder 14 is installed on the base 10, the rod 12 is extended and contracted up and down, the rod 12 of the air cylinder Screwed to the support 16 is movable up and down, the support 16 is rotatably installed via a spring 18 via the spring 18 is electrically connected to the external circuit, the front end ...

A capacitor discharge process for welding a braided cable formed from a plurality of individual cable strands to a solid metallic electrically conductive member comprises the steps of: (a) preparing the electrically conductive member for welding by bevelling one of its end portions while leaving an ignition projection extending outwardly from the apex of the bevel; (b) clamping the ...

DOE Patents Patent: Capacitor discharge process for welding ... connecting the electrically conductive member clamped in the cathode fixture to a capacitor bank capable of being charged to a ... as multilayer electrical components by sintering the metallizations and the dielectrics during the fabrication process by application of microwave ...

The present invention provides a kind of chip conducting polymer aluminum capacitor solidification fixture, including train wheel bridge component and lower plate component, the lower plate component are provided with lower plate, steel plate are inlaid with lower plate;The steel plate carries provided with technique, and technique carrier band, which is ...

The adjustable capacitor installing fixture is simple in structure, light in weight and easy to operate, and can be used for greatly increasing the installation efficiency of capacitors...

The utility model provides a kind of super capacitor fixture, its structure comprises plate body, on the upper and lower dual-side of described plate body, be provided with on the fixed head, limit, the left and right sides of outward all vertical protrusion and be provided with fixture block, on two fixture block opposite flanks, offer draw-in groove, on this plate body, also offer the ...

The invention discloses a lead welding fixture for a capacitor. The lead welding fixture comprises a base, a back panel, lead positioning blocks, core positioning racks, auxiliary positioning bolts and limit stop blocks, wherein the two lead positioning blocks are vertically fixed on the front end surface and the rear end surface of the base respectively; a lead insertion hole and an ...

A capacitor module voltage test fixture comprises a base, a fixed clamping plate and a movable clamping plate, wherein the fixed clamping plate and the movable clamping plate are two mutually perpendicular steel plates which are integrally formed; the fixed setting of solid fixed splint and a corner on base surface, the first bar groove that runs through is seted up on the base surface, ...

The adjustable capacitor installing fixture is simple in structure, light in weight and easy to operate, and can be used for greatly increasing the installation efficiency of capacitors in the process of mass production, adjusting the relative positions of capacitors and capacitor clasps through adjusting the height of the height adjusting ring and the angles of the capacitor-clasp ...

The utility model relates to the field of manufacturing of a ceramic capacitor, in particular to a cleaning fixture for the production of a ceramic capacitor. The cleaning fixture comprises a rectangular frame, wherein the rectangular frame comprises two opposite first sides and two opposite second sides; at least two support strips are connected between the two first sides; ...

The utility model provides a novel condenser test fixture, including shell body and control switch, the right side fixed mounting of shell body has control switch, the equal fixed mounting of end has the locking motor about the shell body is inside, one side that the locking motor is close to the shell body middle part is rotated through the transmission shaft and is connected with the ...

The utility model provides thin-film capacitor fixture dispatch mechanism, it includes material storing box, material storing box bottom is equipped with inclined stock guide, the relatively low one end of stock guide is outlet, exit both sides respectively set one piece of fixed plate, loading assemblies are installed between the two fixed plates of material storing box side, two fixed ...

The utility model discloses a chip solid capacitor test fixture, and belongs to a tool for testing chip capacitors, and an objective is to provide a fixture which can perform whole board detection on a plurality of chip solid capacitors stuck on an outgoing line frame. The fixture comprises a positioning device and a clamping device disposed on a base.

The utility model relates to a capacitor fixture which comprises a left fixture, a right fixture, a compression spring and a conductor, wherein the left fixture and the right fixture...
