????? GKN Aerospace ??? Ascend ??,????????????????????,??????????????? "????"???? eVTOL ??? ...

The Aerospace Defense Battery market is expected to grow from an estimated USD 1425.2 million in 2024 to USD 3044.6 million in 2033, at a CAGR of 8.80%. The global aerospace and military battery market has grown significantly in recent years as a result of technological breakthroughs and the advent of new battery applications in space ...

Features include: 1" pitch, fast initialization, reverse battery protection, internal EMI filters, I2C and VITA 46.11 system management. DC input range is 18-50V per MIL-STD-704 and DO-160, but variants support ranges of 12-100V per MIL-STD-1275 and Def Stan 61-5.

The battery is equipped with large electrolyte reserve. These nickel cadmium battery cells are perfect for applications that demand reliability in the toughest environments. Part number 28695-001 has excellent capacity retention during extended cycling. With its high capacity, the battery pack enables extended operating times between charges.

More Information; Item replacement history: Part Number: 40SP100 BATTERY: NICAD, USE 30114-01C=2H: Country Of Origin: United States: Dimensions (L x W x H)

To date they are the only battery manufacturer to supply all battery technologies used in space: Nickel (Ni-Cd, Ni-H 2), primary lithium (Li-SO 2, Li-SOCl 2 and Li-MnO 2) and rechargeable lithium or lithium-ion (Li-ion). ...
