

How to charge solar lights?

The best way to charge solar lights is with sunlight. However, even if you don't have access to direct sunlight, you can still charge your solar lights in other ways. In overcast or winter weather, you can easily charge solar lights with indirect sunlight. What's more, you can even charge your solar lights with no sunlight at all!

How to charge solar lights outdoor garden?

?Solar Powered & USB Rechargeable?The solar lights outdoor with the micro USB rechargeable port not only can be directly charged by the solar energy, in the rainy days or cloudy days, you can charge the solar lights outdoor garden with the provided usb cable. Large 4400mAh rechargeable lithium battery can work continuously for more than 12 hours.

Can You charge solar lights without sunlight?

In overcast or winter weather, you can easily charge solar lights with indirect sunlight. What's more, you can even charge your solar lights with no sunlight at all! Place the solar panels directly underneath a household light to charge them as quickly as possible without sunlight. Place your solar lights as close to the light bulb as possible.

How long do solar lights take to charge?

It's otherwise a very inefficient way of charging a solar panel. How quickly your solar lights will charge with this method depends on the specific model and lights that you're using. For best results, charge your solar panels for at least 12 hours if you're using incandescent lights.
