

How many smart meters are there in Chicago?

As of February 2016, over 950,000 smart meters have been installed in the Chicago area. Smart meters are a key component of smart grid, which improves reliability, provides better service, and gives customers greater control over their electric bills.

Will a smart grid make Chicago a better city?

Implementing a smart grid in Chicago will make the city better by providing residents with improved electric service and supporting environmental sustainability and healthier communities with less energy waste. It will also make Chicago smarter and more resilient, leading to innovation and job creation for a brighter future.

Why is Chicago considered a smart city?

Chicago is considered a smart city due to its investments in next-generation smart grid technology for infrastructure. This includes programs like Retrofit Chicago, which provide families and businesses with more options to save energy and money. New infrastructure investments lay the foundation for long-term economic growth and improved quality of life for citizens.
