

Why are China's solar companies undercutting each other?

China's world-dominating solar firms have been forced to sell below cost after a breakneck buildup in capacity to feed China's renewables boom. Companies are undercutting each other to maintain market share, and most are expected to report losses this year, BloombergNEF said in a report earlier this month.

What happened to solar panels in China?

As a result, in the decade through to 2020, the cost of solar panels fell about 85 per cent. Earnings have deteriorated: about a third of China's listed solar companies reported a loss last year and several went bankrupt.

Should China's solar industry exit the market?

China's main solar industry association earlier this month called for rational pricing and urged companies to be more disciplined in bidding for projects. Over the summer, it said struggling manufacturers should exit the market as soon as possible.

Is China's solar panel industry in upheaval?

But China's solar panel domestic industry is in upheaval. Wholesale prices plummeted by almost half in 2023 and have fallen another 25 per cent in 2024. Chinese manufacturers are competing for customers by cutting prices far below their costs, and still keep building more factories.

Why is China's solar industry struggling?

China's world-leading solar industry is grappling with a wave of company failures and consolidation. PHOTO: AFP SHANGHAI - More Chinese solar manufacturers are falling into restructuring or bankruptcy, with a deepening oversupply and fierce price wars causing massive financial losses and threatening many smaller players' survival.

How can China help the solar industry?

The rapid growth of renewables in important markets such as south-east Asia and India could start to redefine the sector. China can help itself, somewhat. As the world's largest consumer of solar panels, it has been ramping up installation plans through new large-scale projects in the region.
