

The battery cabinet contains one (1) 40 A battery disconnect circuit breaker and provides alarm leads attached to the common contacts of the breaker. Battery cabinets may be daisy chained as shown in Figure 7 to increase the reserve time.

Connect the power system's battery cable terminated in an Anderson connector to the first battery cabinet's battery cable terminated in a mating Anderson connector. Connect the second battery cabinet's battery cable terminated in an Anderson connector to the fixed mating Anderson connector located on the first battery cabinet.

The battery cabinet is designed to mount in a standard 19" or 23" wide relay rack or on a wall. Refer to Figure 3 and install the 19" or 23" relay rack mounting angles to the battery cabinet. Mounting hardware is provided with the battery cabinet.

Remove the front cover from the battery cabinet by loosening the top two captive fasteners and lifting the cover up and out of the battery cabinet. Slide the battery tray out of the battery cabinet until it stops. Place the batteries inside the battery tray oriented as shown in Figure 8. Place the provided spacers between the batteries.

Page 20: Battery Cabinet 1.6. Battery Cabinet Optional battery cabinets are available for the UPS, and include a single battery-connector cable. Up to 10 battery cabinets can be connected in parallel to the UPS, and up to 6 can be ...
