

Do solar panels fit on my home?

Typically, your chosen installer will buy the panels to fit on your home. Some only install solar panels from one brand, while others may install panels from a few brands. They may suggest a particular brand depending on your requirements.

What makes a good solar panel system?

The quality of the installation and other equipment (such as the inverter) also contribute to how good the solar panel system is overall. Price also varies depending on the solar panel brand and installer. The Which? members we surveyed owned solar PV panels from more than 20 different brands.

How do I choose a solar panel brand in the UK?

Product availability in the UK can also determine which brands installers are able to fit. When you talk to different installers (we'd recommend getting three quotes), use our research on solar panel brands to help you choose between them. Read our full buying advice for solar panels.

What are the best solar panel brands?

Find out what owners think of JA Solar, Jinko Solar, Longi, Solaredge and Trina Solar solar pv panels to find the best solar panel brand for you.

Why does solar panel efficiency matter?

Solar panel efficiency matters because the more efficient your panels are, the more energy they'll produce and electricity costs they'll offset. This leads to a faster payback period on your system and better ROI. We are committed to providing comprehensive and unbiased reviews to our readers.

Do solar panels have a high efficiency rating?

A few research institutions have developed solar panels with efficiency ratings of 30% or higher in recent years, but this technology has not been adopted in mainstream manufacturing processes, so there isn't a solar manufacturer today that sells panels with this level of efficiency. Why does solar panel efficiency matter?

This also. Brand -A 3kw unit might have a 60a MPPT and a 30a AC charger, brand -B might have an 80a SCC and a 40a AC charger, brand -C might have 2 MPPT inputs ...
