

Domestic solar polysilicon transaction price

Is polysilicon causing raw material suppliers to sell 5% below mainstream rates?

Some Tier-2 and Tier-3 manufacturers, facing outstanding debts to raw material suppliers, are reportedly using polysilicon as repayment, causing the raw material suppliers to sell the received polysilicon at 5% to 10% below mainstream rates.

What are the ad rates for polysilicon?

The AD rates range from 0% to 271.28%, varying by country and manufacturer, with most enterprises assigned specific tariff rates falling within the 50% to 90% range. Buyers and sellers in the global polysilicon market remain uncertain about their next steps amid upcoming developments.

Is there a 'price war' for polysilicon?

A "price war" for polysilicon, according to one source, has already begun. Manufacturers are promoting second-grade polysilicon which is more difficult to sell, offering their product at lower prices because this part of their inventories has been accumulating since the third quarter of 2022.

What's going on with the hung global polysilicon market?

The situation of the hung global market clashes starkly with the domestic China polysilicon market. Average polysilicon prices there, assessed by OPIS as China Mono Grade, plummeted a steep 8.81% to CNY158.83 (\$22.86)/kg this week.

Why did China drop a 'price war' for polysilicon?

Sustained across eleven consecutive weeks, the drop highlights how China's producers are under significant pressure, facing challenges of their own as they sit on surplus material that is tricky to clear. A "price war" for polysilicon, according to one source, has already begun.

What is Opis' price assessment for mono-grade polysilicon?

China Mono Grade, OPIS' assessment for mono-grade polysilicon prices in the country, remained steady at CNY 33 (\$4.55)/kg, or CNY 0.074/W this week. China Mono Premium, OPIS' price assessment for mono-grade polysilicon used for N-type ingot production, likewise held steady at CNY 39.375/kg, or CNY 0.089/W, unchanged from the previous week.

3 ???· All solar PV (Photovoltaic) real-time price update, such as Panle/Module, Inverter, Wafer, Cell, and poly / Silicon, and research reports.

Solar Price; Lithium Battery; Interviews; knowledge. Solar; Energy Storage; EV; Wind Energy; Event. ... and the mainstream transaction price of polysilicon is expected to stabilize. As of this week, there are a total of 17 domestic polysilicon production enterprises, and the number of maintenance enterprises remains at 5. In April

Domestic solar polysilicon transaction price

2024, the ...

Prices across the solar supply chain remained in bearish territory into the fourth quarter of 2024. ... the OPIS price benchmark for polysilicon produced outside of China, fell from \$22.567 (\$0. ...

The mainstream concluded price for mono recharge polysilicon is RMB 65/KG, while mono dense polysilicon is priced at RMB 63/KG and N-type polysilicon is currently priced at RMB 68/KG. Looking at the market transaction dynamics, orders took a hit this week, and collectively signing orders within a centralized period has ceased.

On 3 July, the Silicon Industry Branch updated the polysilicon prices: the transaction price for n-type ingot silicon was RMB39,000-42,000/ton, averaged at 40,000RMB/ton, ...

Polysilicon prices remained stable this week. The transaction price range of n-type rod silicon was 38,000-42,000 yuan/ton, and the average transaction price was 40,000 yuan/ton. The transaction price range of monocrystalline dense material was 33,000-36,000 yuan/ton, and the average transaction price was 34,300 yuan/ton.

The mainstream concluded price for mono recharge polysilicon is RMB 37/KG, while mono dense polysilicon is priced at RMB 35/KG and N-type polysilicon is currently priced at RMB 41/KG. Transaction Dynamics: This week saw limited orders in the polysilicon market, with overall transactions remaining at low levels.

The transaction price was RMB40,000-43,000 RMB/ton, averaged at RMB41,800 RMB/ton, down 2.79% month-on-month. ... at a time when solar-grade silicon prices continue to slump, several polysilicon ...

Polysilicon prices edged up again this week. Among them, the transaction price range of n-type rod silicon was 39,000-44,000 yuan/ton, up 0.73% month-on-month. The transaction price range of monocrystalline dense material was 35,000-39,000 yuan/ton, and the average transaction price was 34,500 yuan/ton, up 0.58% month-on-month.

Influenced by upstream price reductions, there was a slight fluctuation in cell prices, while the momentum for module price increases slowed down. Data from China's National Energy Administration shows that from January to February 2024, China's domestic solar installations reached 36.72 GW, marking a year-on-year increase of over 80%.

On August 3, the silicon branch of China Nonferrous Metals Industry Association announced the latest price of solar grade polysilicon. Data display: The mainstream transaction price of single crystal re feeding is 300000-31000 ...

Last week, the mainstream transaction prices for P-type dense material were 34-38 yuan/kg, and for N-type

Domestic solar polysilicon transaction price

polysilicon, the transaction prices were 40-44 yuan/kg. Polysilicon prices remained relatively stable last week, with minor fluctuations. ... The mainstream transaction prices for domestic monocrystalline silicon wafers (182mm) were 1.10-1. ...

Polysilicon transaction prices begin to show signs of fluctuations. As the year-end approaches, wafer manufacturers are likely to start a new round of negotiations and orders, though most are still in the discussion phase. ... Both domestic and imported module prices fell month-on-month in November. Starting December 1, adjustments to export ...

The polysilicon market, vital for solar module manufacturing, has seen significant price fluctuations due to various market factors and supply-demand dynamics. Mainland China has become a dominant force, influencing both production capacity and global price forecasts. The country's production facilities, such as Asia Silicon, have expanded rapidly, with Chinese ...

The mainstream concluded price for mono recharge polysilicon is RMB 37/KG, while mono dense polysilicon is priced at RMB 35/KG and N-type polysilicon is currently priced at RMB 40/KG. Polysilicon ...

The average transaction price of mono-dense polysilicon outlined above has plummeted by nearly 80% compared to the same period in 2022, when prices reached ...
