

How much does an electric car conversion cost?

At Electric Car Converts, our in-house conversions and kits start at £60,000 for our standard-range system (55kWh) and go up to £85,000 for our long-range battery pack (110kWh).

What is an electric car conversion kit?

An electric car conversion kit is exactly what it says on the tin - it includes everything you need to transform a conventional car into an electric car, whether you choose to DIY it or enlist the electric car conversion services of a specialist.

Should you retrofit your car with an electric conversion kit?

Retrofitting your car with an electric conversion kit is gaining popularity, as it provides a cost-effective way to transition to electric mobility. Several companies now offer conversion kits at competitive prices, allowing you to upgrade your car without the high cost of purchasing a new electric vehicle.

Are EV conversions available in the UK?

Several companies in the UK now offer EV conversions, either for classics or more modern cars. Electric Classic Cars does what its name implies, and has converted such icons as the DeLorean DMC-12, Morris Minor, Porsche 911, original Range Rover and Volkswagen Beetle to electric power.

How much does a car electronics kit cost?

A kit can cost anywhere between £25,000-£55,000. Universal kits are cheaper, while kits for specific vehicles tend to cost more. Although you can install a kit yourself, it's far safer to engage a professional to tackle the complex electronics. At Electric Car Converts, we offer safe kit installations and peace of mind.

Are electric car conversion kits a viable alternative?

For many people, the cost of a brand-new EV remains prohibitive and the supply of second-hand EVs hasn't yet caught up with demand. Electric car conversion kits offer a viable alternative, especially if you already own a classic car that you can upcycle.

Several companies now offer conversion kits at competitive prices, allowing you to upgrade your car without the high cost of purchasing a new electric vehicle. This article will explore the top 10 companies specializing in converting petrol or diesel cars into electric vehicles.
