

Are commercial solar PV panels right for your business?

Solar PV panels for the manufacturing, engineering & waste management sectors. Expansive roof space, intensive machinery & enormous energy bills - just a few reasons as to why commercial solar PV panels are the perfect match for UK manufacturing, engineering and waste management companies.

Are solar panels a good investment for the manufacturing sector?

Generally speaking, the higher the user of energy - the higher the savings and therefore the larger the benefits sought - making the manufacturing sector the perfect case for solar panels and renewable energy technologies.

Why should manufacturing and engineering businesses install solar PV panels?

Through installing solar PV panels manufacturing and engineering businesses are able to considerably cut their overheads, improve business operations and increase their bottom line with up to 100% savings on their daytime electricity costs.

Is self-financing a good option for commercial solar panels?

Whilst self-financing is the most popular option for purchasing commercial solar panels and offers the best returns over the lifetime of a system, many companies have restricted budgets or would prefer to spend their capital elsewhere. Solarsense has partnered with some of the UK's leading financial institutions.

Why should your business install solar panels?

Installing solar panels not only reduces business overheads but improves your 'green credentials', in turn creating an effective PR tool. If your organisation qualifies for ESOS, Solarsense can help to assess your current energy use and provide a solar PV desktop survey for your company to submit with your next energy audit.

Why did a manufacturing company choose solarsense?

Due to colossal energy bills, this manufacturing company turned to Solarsense to install a 249.76kWp solar PV and online monitoring system. The total net benefit to the manufacturing company over the next 20 years is in excess of £1.5 million. One of the first industrial buildings in the UK to achieve a BREEAM Excellent rating.
