

Is energy storage regulated?

Whilst the Department of Business, Energy & Industrial Strategy ("BEIS") and Ofgem have been supportive of energy storage and recognise the benefits and flexibility provided by the various technologies, there is no specific legislation on or regulation of storage at present.

Why are we legislating electricity storage?

Why are we legislating? Electricity storage covers a range of technologies that store low carbon energy for when it is needed, for example in batteries on the wall of your home or business, or in facilities that pump water to higher reservoirs when electricity is abundant, and let it flow back down through a turbine when it is scarce.

What is the 'cap and floor' regime for long duration electricity storage (LDEs)?

Ofgem is the regulator for Long Duration Electricity Storage and oversees implementation of a 'cap and floor' regime for LDES projects, proposed by the Department for Energy Security and Net Zero (DESNZ). The aim of this regime is to stimulate investment in Long Duration Electricity Storage projects.

Who regulates electricity storage?

Ofgem is the relevant regulator for electricity storage, though as noted above there is no specific storage regulatory regime. Ofgem has recognised that there are regulatory changes required to enable the full commercial development of storage and it has committed to working with other stakeholders to consult on such changes.

Can long duration electricity storage save energy?

Long Duration Electricity Storage would reduce costs to consumers through lowering their energy bills, by avoided electricity grid reinforcement and avoided peak generation plant build. LCP's modelling estimates savings for the energy system (and ultimately the energy consumer) of up to £24 billion by 2050.

Should electricity storage be formalised as a subset of generation?

Formalising electricity storage as a distinct subset of generation removes current ambiguities and provides long term clarity and certainty over its treatment within the existing frameworks (e.g. planning and licensing) and possible future frameworks.

At the same time, the new regulations have also proposed higher penalty standards for violations. Energy-Storage.news" publisher Solar Media will host the 2nd Energy ...

In a wide-ranging report, released March 30, the Government Accountability Office outlined some of the challenges facing energy storage and detailed the planning, ...
