

How are lithium-ion batteries recycled?

Once batteries are collected, they are sorted and dismantled so that the parts can be separated for recycling. The recycling of lithium-ion batteries is a complex and regulated process. This guide provides an overview of the process and explains the regulations that apply to battery recycling in the UK.

How are batteries recycled in the UK?

In the UK, the recycling of lithium-ion batteries is regulated by the Waste Batteries and Accumulators Regulations 2009. These regulations require producers of portable batteries to fund the collection and recycling of used batteries. The battery recycling process begins with the collection of used batteries from businesses and households.

Can you recycle a battery?

Reduce fire risk and save precious resources by recycling your batteries. Common household batteries include lithium-ion button batteries from watches, hearing aids, etc., as well as standard barrel-type batteries (AAs, AAAs and so on). You must recycle these household batteries at dedicated battery collection points.

What legislation affects the disposal of lithium batteries in the UK?

The Waste Electrical and Electronic Equipment (WEEE) Directive is another important piece of legislation that impacts the disposal of lithium batteries in the UK. This directive sets targets for the collection, treatment, and recycling of electrical and electronic waste, including the batteries that power these devices.

Where can I recycle lithium batteries?

You can take batteries to your local Reuse and Recycling Centre or to a number of other locations such as shops and libraries to be safely recycled. Use this locator to find your nearest battery recycling collection point or see the links below and visit your Borough's website for more information. Keep lithium batteries separate!

Can you use a lithium battery if it runs out of power?

Single-use lithium batteries, often found in watches and remote controls, can only be used once and must be disposed of when they run out of power. In the UK, several laws and regulations have been put in place to ensure the proper disposal of batteries, including lithium and lithium-ion batteries.
