To see prices for yourself, click here to shop batteries and enter your vehicle registration number (VRN) to find batteries suitable for your car - the fitting price is shown next underneath each battery, and on each product page. Shop Batteries Was this helpful?

Where can I buy a replacement car battery?

This means that the competition is quite strong--the replacement battery doesn't have to be labelled as a main dealer only part, and you can quite literally pick up car batteries from a wide range of outlets: high street automotive accessory stores, independent motor factors, main dealers, and of course, the independent workshop.

What are the different types of car batteries?

There are three main types of car battery: the standard lead-acid batteries (at the cheaper end of the market), along with absorbent glass material (AGM), and enhanced flooded batteries (EFB), which both tend to be pricier. Let's take a look at some of the major factors that influence car battery replacement costs:

How long do car batteries last?

Car batteries aren't meant to last forever. In fact, most will only last three to five years. However, various factors will cause some batteries to fail more quickly than others. One of the most common reasons for battery failure is power drain. Accidentally leaving your headlights on overnight is an obvious cause.

What type of battery do electric cars use?

Lithium-Ion: Expensive and used predominantly in high-end luxury vehicles. They offer a long service life and can be discharged far lower than conventional lead-acid batteries. Electric cars also have a 12-volt battery, these can be of a standard lead-acid type or lithium-ion in pricier models.
