

## How much power does a 6-cell lithium battery have

Is a 6 cell battery better than a 4 cell?

A 6 cell battery is usually bigger and heavier than a 4 cell in terms of physical size. It has more capacity so that it will last longer per charge, but this also means that your laptop is even bulkier (a compatibility issue to some laptop owners).

How many Mah does a 6 cell battery have?

So, the amount of cells doesn't define the power of the battery in a frank discussion. In this case, 6-cell comes with 4400mAh which is way more than a 4-cell battery (2600mAh). More mAh means more run-time. If you need a battery for heavy use and long run-time then 6-cell should be the priority but other than 4-cell should do just fine.

How long does a 6 cell battery take to charge?

Another thing to note about the 6 cell battery is that it takes longer to charge. It might take up two-four hours, while a 4 cell can need about an hour or so, which makes them more suitable for people who need their laptop running constantly and can't wait around all day long while it charges its batteries.

How many volts is a 3 cell battery?

The battery is merely a container grouping them together. So a 3 cell battery will have 3 cylinders inside of it. A normal cell will have about 1.5v power output, so a 3 cell battery would have  $1.5 \times 3$  (4.5) volts being output when used. So the 6 cell battery is 9V?

How long does a 6 cell battery last?

Charge times mainly depend on the battery quality and the reserve capacity. Normally a 6-cell battery can provide you 4-5 hours if fully charged. How long does a 4-cell battery last? A 4-cell will last 2-4 hours max after being full-charged. Though it depends on other matters such as reserve capacity.

How many cells in a 4 cell battery?

The more the Whr is the better it will deliver you. 4-cell means that it has 4 cells in its battery pack along with 4 lithium-ion 18650 type cells. The battery capacity always depends on the user's purposes. 18650 can provide you 2Ahr range to 3.4Ahr, so to be honest you should always look for the higher Whr and not the number of cells.
