

How to check the energy storage charging pile meter numbers

What are energy meter numbers?

If you have an electricity and gas supply, you'll have two unique energy meter numbers: MPAN - stands for Meter Point Administration Number and refers to your electricity. It's also sometimes known as a 'supply number' or 'S number'. MPRN - stands for Meter Point Reference Number and refers to your gas. It's also sometimes known as an 'M number'.

What is a gas meter reference number (mprn)?

An MPRN (Meter Point Reference Number) is a unique identifier for your gas supply point. This number, typically between 6 and 10 digits, helps gas suppliers locate and manage the gas supply to your property. As with the MPAN number, the MPRN is specific to the physical location of the gas meter and does not change when you switch gas suppliers.

What is a meter point administration number & mprn?

Energy suppliers and networks use two unique numbers to identify your home's electric and gas supplies. In the mainland UK they're called Meter Point Administration Number (MPAN) for your electricity supply, and Meter Point Reference Number (MPRN) for your gas supply.

What does MSN mean on a gas meter?

The MSN is a unique identifier for the physical gas meter itself, consisting of letters and numbers, and is typically found on the meter box where as the MPRN (Meter Point Reference Number) identifies the gas supply point to your property. Why do you need to know your energy meter numbers?

How do I Find my mprn on my gas bill?

You can find your property's MPRN on your gas or dual fuel bill. It's usually marked 'Meter Point Reference Number' and is between six and 10 digits long. You won't find the MPRN on the actual gas meter box. An example of an MPRN is: 1875258102. How do I find my MPRN without a gas bill?

How do I get my meter point reference number?

They can also provide your Meter Point Reference Number (MPRN). Telephone: 0870 608 1524 (this call will cost 7p per minute plus your telephone company's access charge). Ready to Switch Energy?

Energy storage charging pile refers to the energy storage battery of different capacities added a C- ... unit, and then calculates the maximum number of charging piles using the actual measurement.

Find a property's energy certificate including an energy performance certificate (EPC), display energy certificate (DEC) or air conditioning inspection certificate.
