How do I install a solar PV system?

The first step in installing a solar PV system is meeting with a qualified solar installer. During this initial consultation, the solar company will: - Assess your energy needs : By reviewing your electricity bills and understanding your consumption patterns, the installer can recommend the right size and capacity of the solar system.

Should you DIY a solar panel system?

Setting up a solar panel system can be one of the most exciting home projects you'll ever take on, whether you're ready to tackle it yourself or prefer to bring in the pros. DIY offers that hands-on satisfaction--the thrill of piecing together your own energy source, step-by-step, right on your roof.

How do I set up a solar panel?

Note: When setting up your system, the solar panels should be out of the sun or covered for safety reasons. Step 1: Hook up the battery to the charge controller. Connect the battery terminal wires to the charge controller FIRST, then connect the solar panel (s) to the charge controller.

What is a solar inverter & battery installation?

Inverter and Battery Installation One of the most important parts of solar power is the inverter. This is responsible for converting DC power to AC power so it can be used in your home. It also feeds excess electricity to the grid. Our experts will choose the right inverter size for your needs, and then install it in the best place.

How do I connect my solar system to the grid?

If your solar system is grid-tied, it will need to be connected to the local utility grid. This step involves: - Net metering setup : Many utility companies offer net metering, which allows you to send excess energy back to the grid and receive credits toward your energy bills. Your installer will set up the appropriate meters for this.

How does a solar panel installation work?

Mounting the panels: The installers will begin by securing mounting brackets to your roof or the ground (if it's a ground-mounted system). The panels will then be securely attached to these mounts. - Electrical wiring : After the panels are mounted, the electrical wiring will be connected to the inverter and electrical panel in your home.
