

## Is it okay to back up the batteries in the communication network cabinet in advance

How do I monitor a single UPS battery back-up?

You can usually monitor a single UPS battery back-up through an optional network card. Eaton network cards are essentially their own servers, so they record event history, send email and text message alerts and provide remote access to real-time status. Using a network card is usually the best way to manage a single UPS system.

Can you put a UPS battery back-up on a wall?

Placing a UPS battery back-up on the wall limits access to it, which is a good thing! You'll need to make sure that you mount the UPS to the wall so that it's stable. You can also install a UPS inside of a wall-mount rack enclosure, such as the MiniRaQ by Eaton. Due to their lighter weight, UPS models with lithium-ion batteries are a good choice.

What is a network cabinet?

Network cabinets and intermediate distribution frames (IDF) are critical parts of IT networks, but they're often scattered about. They seldom have dedicated IT personnel close by and are often neglected. A network cabinet can be a lonely place!
