

# Is the solar energy storage system worth buying

Is it worth getting a solar storage battery?

A solar battery allows you to store electricity produced by your solar panels and use it later or, in some cases, sell it back to the grid to make a few quid - but they're not cheap. Read on to see if it's worth getting a solar storage battery for your home... This is the first incarnation of this guide.

Is a solar battery worth the investment?

A solar battery is absolutely worth the investment. It enables you to use more of the electricity your panels generate - which cuts your costs - and allows you to take advantage of the best export tariffs around, massively boosting your savings.

How much money can a solar battery save a year?

Only around £130 a year is saved by using stored energy in your battery. As solar batteries come with a huge upfront cost, and the extra savings are relatively small, most will be unlikely to recoup the cost of buying a battery over its lifespan - though of course, it depends on the cost of the battery, the price of electricity and how you use it.

Why should you buy a solar battery?

This should reduce your energy bills - and your carbon footprint. For example, if you're not at home during the day to use the energy your solar panels are generating, having a battery will enable you to store (and later use) energy from your solar panels. A solar battery means you can take advantage of cheaper electricity.
