

What training courses are available for shipping lithium batteries?

Large Lithium Batteries Here are the training courses for Shipping Lithium Battery Dangerous Goods. Section I and Section II. UN3091, UN3090, UN3481 and UN3480. Held nationally in the UK and our courses include Lithium Batteries by Sea (IMDG), Air (IATA) (ICAO) and Road (ADR).

Do you offer training for lithium batteries?

If you only ship Lithium Batteries, we offer specific training for Lithium Batteries by Air (IATA), Road (ADR) and Sea (IMDG). Depending on the power of your batteries, there are two options for training; these are referred to as Large Lithium Batteries and Small Lithium Batteries.

What is a lithium batteries course?

This lithium batteries course is intended as initial or recurrent training for participants involved with the handling, shipping, and/or transport of Lithium Batteries by air.

Why should you take a lithium-ion battery safety course?

Whether you're an employer, manager, or employee, our course will equip you with the knowledge and skills to create a safer work environment when dealing with lithium-ion batteries. Join now and take the first step towards promoting lithium-ion battery safety and wellbeing in the workplace.

What type of batteries should I use for training?

Depending on the power of your batteries, there are two options for training; these are referred to as Large Lithium Batteries and Small Lithium Batteries. Large Lithium Batteries - Lithium Ion Batteries with a watt-hour rating of over 100Wh or Lithium Ion Cell with a watt-hour rating of over 20Wh

What happens if I complete the lithium-ion battery training?

If you complete the lithium-ion battery training on SHINE, you will receive a certificate on successful completion of the course which is downloadable as a PDF file. Where and why lithium-ion batteries are used and their desirable properties.

ICAO Training on Lithium Batteries 6-7 June 2016 Paris, France Overview ... Dangerous Goods Special Provisions: Lithium Batteries o Technical Instructions, Part 3, Table 3-2 o Special Provisions (SP) listed against the Lithium Battery Proper Shipping Names in Table 3-1

These are just some of the common industries that may require lithium-ion battery awareness training to help prevent incidents of battery fires. However, if your workplace is managing Class 9 risks, staff need to be trained to understand proper handling and storage procedures - as well as charging and usage practices.

However, special provision 188 of IMDG Code exempt certain requirements of IMDG Code. Applicable only

for. Lithium metal or lithium alloy cell, the lithium content is not more than 1 g; Lithium metal or lithium alloy battery, the aggregate lithium content is not more than 2 g; Lithium ion cell, the watt-hour rating is not more than 20 Wh

ICAO Training on Lithium Batteries July 2015 Lima, Peru . OVERVIEW . Overview o Background on Lithium Batteries in Air Transport ... o Dangerous Goods Special Provisions: Lithium Batteries . Overview o Lithium Battery Packing Instructions o Dangerous Goods Transport Documentation o Dangerous Goods Markings o Dangerous Goods Labels ...

Lithium-ion batteries (sometimes abbreviated Li-ion batteries): A secondary (rechargeable) battery where the lithium is only present in an ionic form in the electrolyte. Also included within the category of lithium-ion batteries are lithium polymer batteries. Lithium-ion batteries are generally used to power devices such as mobile telephones ...

However, lithium batteries are dangerous goods, and can pose a serious safety risk if not prepared in compliance with the transport regulations, and the shipment of lithium batteries by air is a very fast growing, but sometimes very complicated process. It is estimated that 8-10 billion lithium batteries are transported by air every year.

The effect of the battery environment on the performance of the battery; To estimate the state of health and state of charge of the battery; Design and develop an intelligent battery management system; Research ...

Lithium-ion batteries are widely used in portable electronic devices, electric vehicles, and other applications, and proper handling and storage of these batteries is essential for workplace safety. Our course is designed to provide you with a comprehensive understanding of lithium-ion battery safety, including how to identify hazards, prevent incidents, and respond ...

We recommend you do this course if your organisation uses laptops, mobile phones, power tools or forklift trucks; allows employees to use and charge their personal LiB powered devices on site; stores new Lithium-ion battery powered ...

Whether you're an employer, manager, or employee, our course will equip you with the knowledge and skills to create a safer work environment when dealing with lithium-ion ...

UN3091, LITHIUM METAL BATTERIES PACKED WITH EQUIPMENT, 9 (Special Provision 188 -> Small, excepted cells & batteries) ONLY TRAINED HAZMAT EMPLOYEES MAY SHIP LITHIUM BATTERIES USING THIS GUIDE. Some batteries are regulated when shipped or offered for transportation. If the battery is restricted, then all applicable hazardous materials ...

We have experience in training in Hazardous Materials & Environments, Chemical Hazard Awareness, Pollution and Spill Kit Awareness, Chemical Spill Responder, Chemical Spill Incident Management,

Competent to Receive Petroleum Deliveries, Dangerous Goods Safety Adviser, Lithium Battery Hazard Awareness, Control of Substances Hazardous to Health Awareness, ...

Day 1: o Course Outline o UK Law o Applicability o General Philosophy o Forbidden / damaged /defective Lithium batteries o Hidden dangerous goods o Pax and crew o Transport by post o Variations o Class Day 2: o Proper shipping names and UN numbers o Special provisions o Selecting packaging o Overpacks o Packing Instruction o Testing of packagings o Packaging ...

Our extensive training portfolio includes topics for airlines, airports, cargo operators, governments, ground service providers, travel agents, young professionals and more. ... Over three days you will explore IATA's Lithium Battery Safety Regulations (LBSR) and learn how to use the CEIV Lithium Battery audit checklist to ensure the safe ...

The health of the battery can be examined by researchers as an element for the useful life of the lithium-ion battery and this is crucial for BMS. For these reasons, the goal of many researchers is to monitor the lithium-ion battery through the State of Charge. SOC Analysis is crucial for predicting the End of Life for LIB. Many Machine Learning techniques have tried ...

ICAO Training on Lithium Batteries September, 2016 Abu Dhabi. Overview o Classification of Dangerous Goods o Dangerous Goods List: Lithium Batteries o Dangerous Goods Special Provisions: Lithium Batteries o Lithium Battery Packing Instructions. Overview o Dangerous Goods Transport Documentation
