

Most Londoners live in a flat, either as a tenant (private or social) or as an owner-occupier (leaseholder). And due to the differences in property type and ownership context, installing solar panels on the roof of a block of flats is very different than installing them on a street-level, single-dwelling home.

27 ???· Companies interested in an engineering, procurement and construction contract for two 20 MW ground-mounted solar plants in eastern Uganda must request pre-qualification questionnaires by Feb. 21 ...

Strong technical knowledge of domestic and commercial solar PV systems, including design principles, components, and grid integration. Strong knowledge of design software including AutoCAD and PV*SOL; 5+ years of experience in solar PV system design and engineering, with at least 2 years in a leadership or management role with direct reports.
