

# Make a 12v mobile power bank with iron-aluminum battery

How do I make a power bank?

This power bank is up to 1000mah and super easy to make - all you need is a DC battery, connecting wires, soldering iron, a charging circuit board with a DC converter module. Now you'll be able to charge your phone when you're on the go or have no access to electricity.

What is a homemade power bank?

This homemade power bank uses a boost converter, Li-ion battery, switch, charging module, solder tabs and other basic materials - nothing too expensive. This power bank is just designed for charging Android phones. Follow these instructions to make your own.

What is a DIY laptop power bank?

The DIY Laptop Power Bank is the ideal portable power source for anyone who uses a laptop, smartphone or tablet on the go. It is the perfect bit of kit to charge your laptop when you don't have the luxury of a wall socket and when there's no electricity. The power bank is designed with a Lithium-ion battery pack, and a buck and boost converter.

How to make a powerbank from a laptop battery?

We will use those cells to make a powerbank at home. Carefully open the laptop battery without damaging the cells inside. Using wire stripper, cut the solder tabs connecting the cells. Separate each cell and clean them with a damp cloth to remove the adhesive. Using a multimeter, check the voltage of each individual cell.

Can you make a power bank from scrap laptop batteries?

As you can see, it is a very simple project and gives a very usable result. You'll be using scrap laptop batteries to make this power bank. It's a lightweight power bank, and very easy to make. This homemade power bank uses a boost converter, Li-ion battery, switch, charging module, solder tabs and other basic materials - nothing too expensive.

How do I charge my homemade mobile powerbank?

Make a slit at the top for the indicator light on the charging module as shown in the image above. Using Hot glue, seal the box completely. Our Homemade Mobile Powerbank is now ready. Plug in a USB device and see it charging quickly with this 8800 mAh powerbank.

This power bank is up to 1000mah and super easy to make - all you need is a DC battery, connecting wires, soldering iron, a charging circuit board with a DC converter module. Now you'll be able to charge your phone ...
