

# New Energy Battery Replacement Service Process

How does a battery replacement service work?

When you send your battery to the company for replacement or repair, the first step is for them to hook it up to a machine that charges and discharges to identify the issue. After diagnosing the problem, they will provide you with a quote detailing the cost and any necessary repairs or replacement services.

How can I initiate a battery replacement service?

To initiate a battery replacement service, the Customer must first download and/or run the HP Battery Check program. Then, they should call HP for support and report the battery check diagnosis to validate that a replacement battery is needed.

What does a battery replacement service include?

Image does not reflect the current battery that will be installed. Battery replacement service includes a full physical integrity check, pressure test, data transmission test, replacement of seal and o-rings, installation of the new battery, and disposal of the old battery.

How many batteries have been repaired by nowos?

92% of batteries repaired since Nowos was established in 2019. A team of professionals with extensive experience in the lithium-ion battery, waste treatment and compliance sectors. If you want to know more about our project, or simply discuss one of our solutions, please contact us.

Should LPs batteries be repaired?

Repairing the LPS battery holds significant advantages within the framework of a circular economy. Embracing repair practices extends the lifecycle of batteries, promoting resource conservation and minimizing waste. This aligns perfectly with the principles of reusability, repairability, and recycling that form the foundation of a circular economy.

Why should you replace a worn-out lithium ion battery?

Replacing a worn-out Lithium Ion Battery signifies wastage for vehicle operators, the environment, and all its inhabitants. Here at Remanufactured Parts Ltd, this is a cause close to our hearts. With 27 years of engineering expertise, our Senior Engineer Jon Lowe has dedicated the last 5 years to repairing these batteries.
