Greg and his team installed my solar system in May 2023. I have a 8kW inverter and started off with 2 x 5.5kW life batteries and 10 x 550W which I expanded on a few months later.

To keep them mostly off my power usage. Like I'm doing for the solar well pump. I live in San Diego, so running the heater is not really needed. The solar array will be roughly 150 ft away from the house, closer to the water tank and booster pump. I was thinking of putting the inverter and batteries there, in a shed and then running power to house.
