

Are lithium system batteries ready for your street car?

But with advances in technology, some manufacturers have begun offering lithium system batteries with their cars for the remaining 1 percent. But are they ready for your street car today? In the world of hybrid and EV vehicles, lithium batteries are nothing new.

Where can I recycle AA batteries?

From February 2010, shops selling more than 32kg of batteries a year (approx 345 x four-packs of AA batteries) have to provide battery recycling collection bins in store. This means there are now lots more places where you can take your old batteries for recycling.

Where can I recycle old batteries?

This means there are now lots more places where you can take your old batteries for recycling. If you can't see a collection box, ask a shop assistant if they have one - sometimes they keep it behind the counter.

How do councils collect old batteries?

Some councils will collect old batteries with normal waste collections. Some councils stipulate that batteries must be placed in a clear bag and tied up, and placed on top of normal waste bins for collection - important to note that they still do not want batteries in with general household rubbish.

How do I dispose of old batteries?

Simply take your old batteries, and dispose of them in the bins provided when doing your weekly shopping. It's easy, it's quick and it's free. Battery recycling bins are usually found near the main entrances or exits of their stores. If you can't find it on entry, ask a member of staff and they'll point you in the right direction.

Should old batteries be disposed of in home waste bins?

Under no circumstances should old batteries be disposed of in home waste bins. Batteries disposed of in this way can cause chemical harm to the environment (if crushed or damaged) or even start fires at waste disposal facilities - which has happened in the past.
