Are battery retailers obligated to recycle used batteries?

Then, battery retailers are obligated to recycle used cells in Denmark, Sweden, and other European countries, and they implemented a special excise tax of 6-8% on batteries sold. According to ref. 31, the recycling rate of waste batteries and mobile phone batteries has exceeded 75% in Denmark and 95% in Sweden.

Where can I recycle a battery?

There should be a collection point at the premises for 'portable' batteries. These include AAA, AA and 9V batteries, battery packs, button batteries and rechargeable batteries, which can be found in a huge range of products. Basically, all batteries apart from those designed for vehicles or industrial use can be dropped off for recycling this way.

Can a battery catch fire if dumped in a rubbish bin?

There's also a safety issue to bear in mind, as some types of battery (lithium-ion) can catch fire if dumped in your rubbish bin, particularly if they get wet or are damaged. You can take most waste batteries to your local supermarket, or any other big shop nearby that sells over 32 kg of batteries a year.

Why do batteries need to be recycled?

Improperly discarded batteries contribute to growing landfill waste, occupy space, and pose leakage risks. Recycling ensures batteries are processed in specialized facilities, diverting them from landfills and reducing environmental hazards. Diverts batteries from landfills to recycling facilities.

Are alkaline batteries safe for landfill disposal?

Alkaline batteries, commonly used in household devices like flashlights and toys, are safe for landfill disposal since they no longer contain mercury. Back in the 90s, mercury was the main component of single-use batteries. As you know, mercury is a highly toxic element and can cause severe health damage to your body.

Are rechargeable batteries harmful to the environment?

Rechargeable batteries, like lithium-ion and nickel-metal hydride (NiMH), contain heavy metals like cadmium, nickel, and lithium that are harmful to the environment if not recycled. Recycling these batteries helps recover valuable materials, reducing pollution.
