

Should you buy a refurbished battery for your electric car?

Refurbished batteries are an increasingly popular choice among electric car owners as a reliable and cost-effective alternative to new ones. Furthermore, their use helps minimize environmental damage associated with battery manufacturing and disposal processes.

Where can I find guaranteed used or replacement car batteries?

If you're looking for Guaranteed Used or Replacement car batteries, 1st Choice Spares puts you in touch with UK Breakers and battery specialists - Instantly. Enter the Reg Number or Vehicle details and Select car battery from the list of parts available.

Can a refurbished battery be recycled?

A refurbished battery, however, can often be recycled and reused - much better for the planet! Refurbished batteries have been cleaned, tested and restored to their original state for greater longevity and improved performance than a brand-new battery would offer. Plus, by choosing this route you'll save money.

How do I buy a used car battery?

Search through thousands of second hand car batteries and find the exact one to match your make and model of car. You can buy genuine OEM batteries through to aftermarket ones from leading brands. By purchasing a used car battery you can save so much money over having to buy one brand new from the retailers or main dealers.

Are reconditioned car batteries worth it?

Reconditioned batteries offer substantial cost-cutting potential when shopping for hybrid Lexus or Toyota batteries - or any other car battery type. Being mindful that reconditioned batteries could save hundreds of dollars is vital when owning multiple cars! Electric cars require reliable batteries that can hold a charge for long.

Should you buy a reclaimed car battery?

Simply buying the reclaimed car battery is the cheapest option for you and the environment. Don't be put off at the thought that it is not new. Think about this: Most of us buy cars second hand. All the parts will thus be 'second hand' to the new owner. Battery recycling is a way of reducing the amount of batteries being dumped.
