

Requirements for outdoor installation of solar panels

Why do solar panels need building regulations?

Compliance with building regulations helps protect the integrity of the building, ensures electrical safety, and minimizes the risk of accidents or damage caused by improper installation. In the UK, the installation of solar panels is subject to both planning permission and building regulations approval.

Do solar panels need planning permission in the UK?

In the UK, the installation of solar panels is subject to both planning permission and building regulations approval. While planning permission focuses on the aesthetics and impact of the installation on the local environment, building regulations primarily deal with the technical aspects of the installation.

Do I need planning permission to install solar panels?

However, make sure you follow all building regulations and apply for planning permission if necessary, as your neighbour could report your installation to the local authority if you don't - which could result in your panels having to come down.

Do solar panel installers have to comply with building regulations?

Your solar panel installer will mainly focus on the building regulations that apply to structural safety, electrical safety, and ventilation. However, tradespeople have to comply with all building regulations while carrying out any job.

What are the requirements for ground-mounted solar panels?

The installation must not be on a listed building or within a conservation area. The total area of ground-mounted panels must not exceed 9 square meters. They must be positioned at least 5 meters away from any boundary. Ground-mounted installations in protected areas or designated sites may require planning permission.

Do ground mounted solar panels need planning permission?

Ground mounted solar panels won't need planning permission (they'll be covered under Permitted Development Rights) as long as the installation adheres to the following: If your installation isn't going to abide by the above rules, then you'll need to apply for planning permission.
