

# Solar Photovoltaic Panel Installation Outsourcing Contract

What is a solar contract?

Solar Contracts are fine-tuned for small and medium-sized, grid-connected solar PV projects. Standardised contracts include: Power Purchase Agreement, Implementation Agreement, O&M Agreement, Supply Agreement, Installation Agreement and Finance Facility Term Sheet. These are complemented by the Implementation Guidelines.

Should a solar installation company Outsource O&M?

Offering O&M in-house may require you to dedicate resources to activities that are not the core of your company's focus, including attempting to fulfill commitments made by a sales team years earlier. Therefore, a major benefit of outsourcing is that it can help your solar installation company maintain its focus on core services.

What is open solar contracts?

Open Solar Contracts is an initiative which streamlines project development and finance processes by offering legal agreements that make contracting faster and less costly. Standardised contracts include Power Purchase Agreement, Implementation Agreement, O&M Agreement, Supply Agreement, Installation Agreement and Finance Facility Term Sheet.

Do solar projects need an EPC contract?

In our experience, most utility-scale solar projects use an EPC Contract. An operation and maintenance agreement: This is usually a medium- to long-term Operating and Maintenance Agreement (O&M Agreement) with an Operator. The term of the O&M Agreement will vary from project to project.

What are standardised solar contracts?

Standardised contracts include: Power Purchase Agreement, Implementation Agreement, O&M Agreement, Supply Agreement, Installation Agreement and Finance Facility Term Sheet. These are complemented by the Implementation Guidelines. Open Solar Contracts review phase is now over.
