

Solar Photovoltaic Sales Commission Program

Do solar salespeople earn commission?

Except in rare sales positions, earning commission has been an expected part of the job. Having skin in the game provides the incentive people need to act with urgency and land new deals. I. Solar Commission Structures: How you pay your solar salespeople matters! I.I. 1. Overall contract price I.II. 2. Percentage of margin I.III. 3.

How do solar sales reps get paid?

Commission Structure for Solar Sales Reps The majority of solar salespeople are paid on a straight commission pay structure without a base salary. Their commission structure can be a lot more complicated than canvassers and territory managers because their overall sales compensation is based on several different commission calculation methods.

What types of employees are paid commissions in the solar sales industry?

There are three main employee types that are paid commissions in the solar sales industry. These include: Canvassers: While not directly involved in coordinating sales or transactions, canvassers help with all of the backend work such as lead generation, customer prospecting, and scheduling appointments for sales reps.

How do solar companies calculate commission rates?

Therefore, some solar companies calculate their base commission rate on the average solar system size and cost to install the system. Then, they'll couple this base rate with incentive multipliers to encourage better-than-average sales. Say your average system size is 6kW, and your average installation cost per watt is \$3.00.

How does a solar sales team work?

To help drive the sale of solar-powered systems, it is standard for companies in the solar energy industry to structure employee pay around commissions. Similar to many other sales-oriented industries, sales teams are composed of different supporting roles that work collaboratively to close deals.

How much does a solar system cost?

The base price commission is static, and published in tiers linked to system sizes. In practice: Jeff sells four solar systems over the course of a week. Two are 6kW, one is 4kW, and another is 10kW. He gets \$1,000 apiece for the 4 and 6kW systems, and \$1,400 for the 10kW system.
