WHAT IS SOLAR POWER (OPERATIONAL)? Our Solar Power Operational All Risks Policy provides you with all risks engineering cover as well as liability cover for your solar farm whilst operational, with a number of optional covers also available. It is designed for ground-mounted solar photovoltaic installations.

Solar Insurance is an excellent tool to protect one's solar power plant be it residential rooftop, commercial OR industrial rooftop, or Ground mounted megawatt-scale power project. It aids in securing the future in the form of insurance and provides coverage from any man-made unforeseen or natural calamities.

Insurance is important to several aspects of photovoltaic (PV) plant operations. Insurance is often a prerequisite for financing, operating permits, interconnection agreements, and leases or as part of a power purchase agreement for an on-site PV system. The history of insurance for PV systems is short compared to other types of assets.

With an aim to insure and protect the interest of solar energy industry stakeholders, the Ministry of New and Renewable Energy (MNRE) has released a list of insurers offering products covering various risks associated with the solar power plants.
