SOLAR PRO. Solar Street Light Panel Installation Directions

How to install a solar street light?

To install the foundation of your solar street light, choose a level and flat ground, with no inclination. Screw and secure the Basis Cage to the ground using the four screws. One side of the Basis Cage should be parallel to the edge of the road. Secure the Basis Cage with concrete, and this will serve as the foundation of your street lamp.

How do you charge a solar Streetlight?

Some solar streetlight models require an initial battery charge before the light will operate. Refer to the manufacturer's instructions for charging procedures. It may involve connecting the battery to an external charger. Locate the light switch and turn it on. Observe the light operation for a few minutes.

How do you install a light fixture on a solar panel?

Follow the electrical circuit diagrams on how the Solar Panels will be connected to the battery, the controller, and the street light. C. Install the Light Fixture on the lamp pole. Place the Light Fixture on the ground, with the back part facing upward. Press the red buttons on both sides of the Light Fixture.

How to choose a solar energy street light?

Analyze the area size and choose suitable system brightness: pick a location that receives the maximum light exposure during the day, and if you live in a shady area, select systems with larger panels. Likewise, find out a suitable weather-resistance level for your solar energy street light.

How to install a solar panel?

A. Lift the lamp pole off the ground for 1 meter, with the use of a supporting bench. B. Install and secure the Solar Bracket at the top of the lamp pole. Place the Solar Panel on the Solar Bracket and secure it with bolts. Solar Panels should be handled with care.

How do I choose a solar light installation site?

Ensure your solar light installation site is free of obstructions from access to the sun. Also, you'll want to ensure there aren't foreign light sources that can interfere with the panel's light sensor. Keep the pole away from heat sources and ensure it's on level, solid ground (we can accommodate if the soil isn't the most sturdy).
