

What are the benefits of low E insulation & thermal films?

Low E insulation and thermal films also offer the benefits of the solar control films by reducing excess heat gain and glare. Low E insulation and thermal films are particularly useful on single glazing and can also add additional performance to existing double glazed units.

Who are solarshield window films?

Solarshield window films are approved accredited installers for the world's largest manufacturers of window film, offering a nationwide survey, supply and installation service for a full range of high performance window films and window graphics, glass containment systems, commercial and residential blinds and window treatment systems.

Why should you use solar adhesive films?

The sun's rays are finally tamed As the seasons go by, our solar adhesive films offer many advantages. In addition to allowing you to control the light as you wish, they provide protection and thermal optimisation for windows and panes: better insulation in winter and a significant reduction in solar heat in summer.

What is thermal window film?

Thermal Window Film is an ideal way to improve the thermal efficiency of glazing. Thermal window film can be installed to existing glazing to reduce heat loss by reflecting heat back to the source. These products are also known as emissivity window films, contain a special coating which reflect radiant heat.

Do solar control films save energy?

SolarGard's 2010 and 2012 Environmental Product Declarations show that their solar control films help save up to 30% on energy costs from cooling. Windows with these films save an average of 100 times more carbon emissions over a 15 year lifetime than are emitted during their production.

Insulation: Norgard films possess a combination of electrical, surface, weather, and thermal insulation properties that make them well-suited for use in solar photovoltaics, providing reliable electrical insulation and protection for the ...

Thermal Window Film is an ideal way to improve the thermal efficiency of glazing. Thermal window film can be installed to existing glazing to reduce heat loss by reflecting heat back to the source. These products are also known as emissivity window films, contain a special coating which reflect radiant heat.. Solarshield offer a range of Low E Insulation and Thermal Window films which ...

Automotive Heat Insulation Film Transparency Requirements. According to Hong Kong's Road Traffic Ordinance (Cap. 374) and the Transport Department 's regulations, vehicle windows must meet specific transparency ...

Tintfit's range of Low E coated insulation films, can offer the benefits of solar films by reducing incoming solar heat and glare in the summer, whilst also reducing the heat loss through glass ...

By combining a low-e coating with solar control properties at high visible light transmissions, SolarGard have developed an innovative window-insulating film technology that goes beyond ...

Demonstration of the effects of light-transmitting materials on insulation, UV, and reflective insulation. It is widely used in solar film, insulating coatings, insulating glass, energy-saving glass. ... A brand-new, unused, unopened, undamaged item in its original packaging (where packaging is applicable). ...

Anti-Graffiti Window Film; Low E Insulation Window Film; Film Brands. 3M. 3M Prestige; 3M Prestige Exterior; 3M Ultra Prestige; 3M Night Vision; 3M Ultra Night Vision; 3M Low E; 3M Anti-Graffiti; ... While offering both solar and safety ...

But as a ballpark figure, you can expect your film to last for a least 10 years - that's how long PR Solar guarantees its window film for. But that doesn't mean to say it might not last longer. ...

Environmentally friendly Ecolux window film helps you achieve energy and carbon savings, improving U-factor* performance by up to 41%** . By combining a low-e coating with solar control properties, we've developed an innovative window ...

All our films are independently safety tested and are certified by the WFAANZ, NFRC, ASTM, ASHRAE and AIMCAL*. * (WFAANZ) Window Film Association of Australia and New ...

Best Window Insulation Film. Frost King V73/4T Shrink Film Window KIT, 4-Pack, Clear, Transparent; Duck Brand Indoor 5-Window Shrink Film Insulator Kit, 62-Inch x 210-Inch, 286217

Before making a decision, let's explore the top two choices: replacing your windows or upgrading with Solar Guard Ecolux window film. a. Window replacement: it's expensive and not always an option ... Both window ...

Our advanced window films offer a range of automotive window films features & benefits designed to meet the needs of discerning car owners. From superior UV protection and heat reduction to enhanced privacy and security, Solar Gard ...

The sun's rays are finally tamed As the seasons go by, our solar adhesive films offer many advantages. In addition to allowing you to control the light as you wish, they provide protection ...
