

Should you install solar panels for your home?

If you're considering joining the renewable energy revolution by installing solar panels for your home, you're on the right track! You could enjoy substantial savings on your energy bills per year and contribute to a cleaner environment.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

How do solar panels work in the UK?

Installing solar panels lets you use free, renewable, clean electricity to power your appliances. You can sell extra electricity to the grid or store it for later use. There are over 1.3 million installations on homes across the UK - see where the UK solar panel hotspots are. Let's look at how they work and whether they're suitable for your home.

Which solar panel is best for your home?

Monocrystalline panels are the most expensive and most efficient but are also the most common and comprise the best solar setup for home energy. Polycrystalline panels come in second and thin-film panels are the least efficient overall. Most solar panel manufacturers provide monocrystalline systems nowadays.

What are solar panels & how do they work?

Solar panels are roof-mounted systems that capture the sun's energy, converting it into electricity for your home. More people are investing in them than ever - with over 1.4 million installations in homes across the UK. They allow you to sell surplus energy to the grid - or store it in a battery to use later.

How many homes in the UK have solar panels?

There are currently around 1.2 million homes with solar panels in the UK, according to the latest MCS installations data. And the numbers aren't showing signs of stopping. So, why are so many people switching to solar energy, and should you be doing it too?

6 ???· Here's a quick list of the equipment you get when you go solar: Solar panels: Capture energy from the sun. Inverter(s): Converts solar energy into energy that your home can use. ...
