

Solar power generation installation and grid connection

Why should a solar PV system be connected to the grid?

For financial benefit. Connecting your solar PV system to the grid allows you to take advantage of the FIT, which gives you a fixed amount of money for each kWh of electricity you generate. On top of these payments for energy generation, you also receive a sum of money for feeding any surplus energy into the grid.

What is a grid-connected solar system?

As the name suggests, a grid-connected solar system is tied to the utility grid. What distinguishes it from other solar setups is that the energy runs in two different ways. When your household requires more energy than your solar system generates, the house draws in energy from the utility.

How do I connect solar panels to the grid?

To connect solar panels to the grid, you need to install a bi-directional meter on your home. This allows energy produced by your solar panels to be fed into the grid when you're not using it, and for you to draw energy back from the grid when you need it.

Can solar panels be connected to the grid?

Solar panels can be expensive but you can connect your solar panel to your home's grid-power electricity. By doing this, you save money and make yourself less dependent on the whims of your municipal supplier. In this article, we go over all the steps to connect your solar panels to the grid.

Can a solar PV system be connected to the National Grid?

While it is possible to have a solar PV system that is not connected to the National Grid, choosing not to connect means missing out on potentially lucrative incentive schemes like the government's Feed-In Tariff (FIT). Here is a list of FAQs on connecting to the National Grid.

What is a grid-tied solar system?

A grid-tied solar system is ideal for homeowners who do not have a considerable budget for setting up a solar PV system that's large enough to satisfy all their energy consumption. You can benefit from this system because it allows you to continuously draw power from the grid, if necessary.
