

What is a solar lift?

The Solarlift, also called a panel lift or PV panel lift, is an economical solution for the speedy and safe transport of photovoltaic and solar panels. Specially designed with a custom carrier that functions as a cargo receptacle, GEDA's solar panel lift is a time-saving space-saving way to reach inaccessible loading areas.

How to lift solar panels up high?

Besides our solar panel lifting bags you will find some other products that will help to get the panels up high to where they are needed. A ladder winch (sometimes called a ladder hoist) with particular fittings to hold the panels are often used on lower buildings. However they offer little protection to the panel itself.

How do you lift a solar panel?

let it fall to the ground flat. Carry the panel vertically onto the bag until it rests against the side attached to the hoist. Good to Go! Besides our solar panel lifting bags you will find some other products that will help to get the panels up high to where they are needed.

Can solar panels be lifted?

Lifting slings could also technically be used around the solar panel and lifted by a hoist or winch- again these offer no protection from damage. When studying all the options for lifting solar panels each has its own set of benefits and your choice will depend on your circumstances.

How much does a solar panel lifting bag cost?

Lifting Gear Direct offers one of the simplest methods of lifting and handling these panels in a safe and secure manner whilst also providing protection - Presenting the solar panel lifting bag!
