Cost savings play a crucial role in deciding whether to buy a solar battery. By storing energy, you lower your monthly electricity bills and maximize the use of self-generated power. For example, if you generate 10 kWh per day but only use 6 kWh, your battery allows you to store the remaining 4 kWh for later use, lowering the amount you draw from the grid.

A solar battery charger - or a solar battery bank - is made up of mini foldable solar panels that hook up to a battery. You can then plug in and power devices such as smartphones, TVs and laptops through the battery's USB ports.
