

Are there any Tier 2 or Tier 3 solar companies?

As such, there are no official lists of Tier 2 or Tier 3 solar companies. However, people in the solar industry needed an easy term to describe all the non-Tier 1 manufacturers, and Tier 2 is the unofficial catch-all term that's used. Tier 1 solar manufacturers are believed to make up no more than 2% of all solar manufacturers in the business.

What is a Tier 1 solar manufacturer?

Boiled down to ordinary English, a Tier 1 solar manufacturer is one of the most successful in the business, whose operations have proven successful enough that banks would lend them money to expand with no strings attached. Technically, Tier 1 is a financial classification applied to solar panel manufacturers.

What are Tier 2 solar panels?

'Tier 2 solar panels' is a term that's used to describe all solar panels that are not Tier 1. BloombergNEF only created criteria used to identify Tier 1 solar companies. As such, there are no official lists of Tier 2 or Tier 3 solar companies.

Are Tier 1 solar panels more expensive?

However, with Tier 1 solar panels, the chances of the solar panels having defects are lower. Tier 1 solar panels are typically 10-30% more expensive than Tier 2 solar panels. Are Tier 1 solar panels worth it?

What is a solar panel manufacturer tier system?

The term sounds good, but many consumers aren't quite sure what it means. The solar panel manufacturer tier system was developed by Bloomberg New Energy Finance (BNEF) to identify major brands in the solar industry. It identifies so-called "bankable" brands--those that are most "likely to be offered non-recourse debt financing by banks."

What are the best solar panel brands?

However, many in the solar industry found Tier 1 lists to be a great way to identify good solar panel brands. In fact, all the best brands of solar panels are either Tier 1 manufacturers right now, or have been classified as Tier 1 in the past. Some examples of Tier 1 manufacturers are Maxeon (formerly SunPower), Qcells, and Canadian Solar.
