

Somaliland Water Storage and Energy Storage Project

What is water infrastructure development program for resilience in Somaliland?

COUNTRY AND PROGRAM NAME: SOMALIA - WATER INFRASTRUCTURE DEVELOPMENT PROGRAM FOR RESILIENCE IN SOMALILAND PURPOSE OF THE PROGRAM: CONTRIBUTE TO A RESILIENT AND SUSTAINABLE WATER AND SANITATION SECTOR TO IMPROVE LIVELIHOODS AND BUILD RESILIENCE AGAINST CLIMATE VARIABILITY AND CHANGE

How many people get access to clean water in Somaliland?

Over 6,000 households get access to clean water following the completion of an EU co-funded Hargeisa water infrastructure project. The population of Somaliland's capital, Hargeisa, has grown rapidly in recent decades, but the existing water infrastructure has failed to keep up and meet the growing needs.

What is the Somali water program?

Needs Assessment: The program will support the recently revamped water sector reforms in Somaliland, to make up for many years of inadequate investments in the water sector, and to assist the water sector to reach the Sustainable Development Goals (SDGs') No 6 on universal access to water and sanitation.

What is the impact of water and sanitation infrastructure in Somaliland?

The dilapidated state of the water and sanitation infrastructure is a major contributing factor to the severe outbreaks of water borne diseases in the country. Improved access to water supply will also sustain other basic socio-economic activities, including livestock rearing, which contributes significantly to the economy of Somaliland.

Can sand dams be built in Somaliland and Puntland?

A newly completed harvest water point at the Haffir dam, Guriel (Credit: Galmudug PIU) The objective of the \$2 million pilot project was to prove whether building sand dams or subsurface dams in dry riverbeds in Somaliland and Puntland was feasible, and whether World Bank projects could be implemented using Government systems only.

What are the outcomes of the Somaliland project?

2. Program Outcomes: The proposed interventions will enhance public health, strengthen resilience and raise the quality of life of the rural Somaliland population in general, benefitting an estimated 250,000 people.

Ministry of Energy and Minerals, Somaliland, Federal Ministry of Energy and Water Resources (MoEWR), Ministry of Finance, Somaliland Proposed Development Objective(s) ... Component 2 -Hybridization and battery storage systems for minigrids Component 3 - Stand-alone solar off-grid access to public institutions (health and education) ...

Somaliland Water Storage and Energy Storage Project

Safeguarding access to water supply for domestic and livestock use during the long dry season (Jilal), with net gains from two to five months of local water supply as a direct result of the increased water storage capacity of the alluvial sand aquifer. Reducing the risk of water-borne pollution through sand filtration.
